Brian's Best' Compost Directions for use

Landscaping

Flower and
Vegetable Beds

Apply 1-3 inches of 'Brian's Best' to the soil.
Incorporate it into the soil to a depth of 5-6 inches.
For best results, mix with topsoil in a 1:1 ratio.

Tree and Shrub
Planting

Mix two parts of native soil with one part of 'Brian's Best' Compost and apply the mixture around the root ball.

Installing Mulch
Layers:

Apply 1-3 inches of 'Brian's Best' to planting beds and around trees and shrubs, taking care not to choke/crowd the crown of the tree/shrub.

Lawn and Turf Care

New Lawn/
Turf Installations

Apply 1-2 inches of 'Brian's Best' to the soil.
Incorporate it into the soil to a depth of 5-6 inches.
Apply seed as recommended by the manufacturer.

Top Dressing

Apply 1/4-1/2 inch of 'Brian's Best' over existing lawn or turf, and rake material to incorporate it below the thatch layer.
Seed as desired.
